KEY FEATURES

* Microban(TM) Antimicrobial Technology

Built into high usage touchpoints to help prevent bacteria growth, Microban antimicrobial technology keeps treated surfaces 99% cleaner than unprotected surfaces, delivering protection for the product's lifetime

* UltraFresh System

Smart dishwasher algorithms introduce clean air and reduce moisture, refreshing the wash system to help prevent the growth of odor-causing bacteria. Interior filters are treated with Microban antimicrobial technology

* Steam + Sani

Save time with a steam and sanitize option that loosens tough soils before the wash cycle begins, so you get a complete wash with no pre-rinsing or soaking necessary. Plus, a sanitization cycle reduces 99.999% of bacteria on dishes

* Dry Boost(TM) with Fan Assist

Dry Boost with Fan Assist gets hard-to-dry items like plastics up to 3 times drier than heated dry cycles using a fan that pulls moist air out, resulting in table ready dishes

* Built-In WiFi Dishwasher

Get the most out of your smart dishwasher with built-in WiFi powered by SmartHQ. Monitor performance, check status and automatically reorder detergent using your mobile device

* Deep Clean Silverware Jets

This dishwasher with powerful cleaning jets washes your silverware to perfection, no matter how you load it. A system of 40 jets blast the silverware basket from the bottom up, removing all stuck-on foods

* Built-In Third Rack

This dishwasher with third rack storage lets you easily clean more items in fewer loads. It gives you extra loading flexibility with a place to wash and dry silverware, spatulas, lids and more

* Fingerprint Resistant Stainless Steel

An advanced fingerprint resistant stainless finish lets you easily wipe away fingerprints and smudges to keep your dishwasher looking clean and new
