KEY FEATURES

*** 2-in-1 Washer/Dryer**

Wash and dry a large load of laundry in about 90 minutes without the hassle of transferring clothes from the washer to the dryer *Based on completing Quick Wash and Dry cycle using a 10-lb load in about 90 minutes.

*** Fast Airflow Drying System**

Warm, high-speed air extracts moisture from garments to gently dry even large loads fast with less heat. Now you can wash and dry everything from a comforter to delicate items from start to finish virtually eliminating the need to hang dry - it's the ultimate one and done laundry experience!

*** The One and Done Laundry Experience**

The UltraFast Combo is designed to enhance the way you experience laundry by optimizing washing + drying all in one machine. Plus, the smarter drying technology combines fast air flow at lower temperatures to ensure maximum care for all your laundry.

*** Easy Installation & Space-Saving Solutions**

Reimagine your laundry space and location with the flexible installation requirements of a standard 120V and no need for a dryer exhaust vent. The Ventless Combo design takes up half the space so you can rethink your laundry room possibilities

*** Greater Energy Savings****

50% more energy efficient drying** with Ventless Inverter Heat Pump (**Efficiency rating as compared to the requirements for ENERGY STAR qualification for standard electric dryers)

*** Adaptive SmartDispense(TM) Technology**

Save time and effort with an intelligent dispenser that holds enough detergent and softener for up to 32 loads. Plus, scan the barcode on the detergent or softener bottle with the SmartHQ(TM) app and the washer will dispense the right amount

*** Pet Hair Removal**

Offers a unique, sustainable solution for pet hair removal. By using filtered high-speed air before the wash cycle, the Combo requires 65%* less water and 50%* less energy than other laundry systems, as it effectively vacuums and captures dry pet hair in the EZ Access two-stage lint filter.

*** Microban(R) Antimicrobial Technology**

Provides antimicrobial protection on the gasket, dispenser, and draining system, to help prevent odors and ensuring your Combo stays fresh and clean load after load
