KEY FEATURES

*** Maximum Responsiveness**

19 heat settings using induction technology and glide touch controls allows burners to quickly adjust and respond, giving you maximum control.

*** Power Boil**

Boil water faster thanks to induction elements that immediately heat your pan, not the cooktop surface.

*** Precision Temperature Control**

Set your burner to an exact degree, not just high, medium or low, with Precision Temperature Control. Using a smart pan, the cooktop maintains a specific temperature - from 100 to 500 degrees. Perfect for sauces, candies and frying.

*** Easy Clean Surface**

A smooth glass surface makes cleaning up messes simpler than ever on this easy clean induction cooktop.

*** Safer Surface**

Stay worry-free with this induction cooktop that automatically detects your cookware, so when it's removed the burner automatically switches off

*** Most Efficient Heating**

Electromagnetic currents directly heat the pan, instead of first heating the cooktop surface, resulting in faster, more efficient heating.

*** Synchronized Elements**

Connect and control two cooktop burners as one to create a bigger cooking surface for pans such as griddles.

*** Chef Connect**

Synchronize your cooktop and GE Profile over-the-range microwave or hood so that your fan and lights automatically come on when a burner is activated with Chef Connect.
